SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science, building production-grade autonomous AI agents and LLM-orchestration systems. Hands-on experience with multi-agent architectures (LangGraph), RAG memory (Supabase pgvector), browser automation (Playwright), and full-stack deployment. Currently seeking AI/ML engineering and AI agent development internships.

EXPERIENCE

Intern — Softsense Technoserve (India) Private Limited March 2025 – April 2025

Nagpur, India

- Built an AI-driven log monitoring system using machine learning and deep learning to detect real-time security anomalies.
- Reduced false positives by 30% and achieved 90%+ detection accuracy through model tuning and feature engineering.
- Developed a Streamlit-based dashboard for live log analysis and automated alerts.

PROJECTS

Baxton — Autonomous AI Social Media Agent 2025

Personal Project

- Engineered a fully autonomous AI agent using LangGraph StateGraph, FastAPI, and Playwright that manages Reddit and Instagram accounts end-to-end via a Telegram Bot — handling outreach, multi-turn conversations, and reporting with zero human intervention.
- Designed a decoupled architecture: a 70B LLM Orchestrator (NVIDIA Llama 3.3) for real-time command execution and a Background Radar Daemon for asynchronous inbox monitoring and autonomous reply management.
- Implemented a Tri-Core Cognitive Architecture (Orchestrator, Decision Engine, Persona-Voiced Drafter) deployed live to collect structured product reviews from real customers with zero manual follow-up.
- Built a Shadow DOM-piercing Playwright scraper with a recursive TreeWalker to extract live chat from WebSocket-rendered Reddit Chat, and integrated Supabase pgvector RAG for cross-session persona consistency across platforms.

OSAgent August 2025

osagent.tech

- Designed and developed a responsive front-end using HTML & CSS, improving page load performance by ~30%.
- Built and integrated backend services using Firebase, enabling real-time updates and secure data handling.
- Managed version control and collaboration through GitHub with structured deployments, and deployed/hosted the application on DigitalOcean, maintaining uptime and scalability.

EDUCATION

B.Tech in Artificial Intelligence & Data Science 2022 – 2026 (Expected)

Anjuman College of Engineering and Technology, Nagpur | Aggregate: 6.60

12th (HSC) 2021 – 2022

Dada Ramchand Bakhru Sindhu Mahavidyalaya, Nagpur | 57%

10th (SSC) 2019 – 2020

St. John's High School, Nagpur | 82%

SKILLS

Programming & Scripting: Python, SQL, HTML, CSS, JavaScript

AI & Agent Development: LangGraph, LLM Orchestration, Prompt Engineering, Multi-Agent Systems, Autonomous AI Agents, RAG (pgvector), Anomaly Detection, ML Fundamentals

Automation & Browsers: Playwright, Playwright-Stealth, Shadow DOM Scraping, WebSocket Extraction, Headless Browser Automation

APIs & Cloud: FastAPI, REST APIs, Telegram Bot API, NVIDIA API, Groq API, Firebase, DigitalOcean, Supabase, GitHub

Databases: Supabase (pgvector), SQL, Firebase Realtime Database, SQLite

Tools & Platforms: Git, VS Code, Streamlit

Soft Skills: Cross-Functional Communication, Problem Solving, Analytical Thinking
